INTRODUCTION:

RS2 Technologies, LLC ("RS2") manufactures designs and sells products (the "Products") for the access control industry. RS2 sells these Products in whole, separately or as part of a card access control system to RS2 dealers (the "Dealer").

SHIPMENTS:

RS2 reserves the right to make partial shipments. All shipments shall be UPS Ground service unless otherwise specified on the Dealer's order.

DEALER WARRANTY:

RS2 warrants to the original purchaser that RS2 Products, excluding items such as software and related documentation, will be free from defects in materials and/or workmanship for one (1) year from the date of delivery. Software is excluded; however defects in software media are covered for 90 days. Software dongles shall have a lifetime warranty against malfunction and defects. In the event a software dongle should need replacing, an advanced replacement will be issued upon receipt of a consignment purchase order from the dealer. The limited warranty covers normal use only. This warranty is not transferable.

The limited warranty covers normal use. RS2 does not warrant or cover:

- damage caused by failure to provide a suitable installations environment
- damage during shipping other than original shipment to purchaser
- damage caused by impact with other objects, dropping, falls, or spilled liquids
- damage caused by a disaster such as fire, flood, wind, earthquake, or lighting
- damage caused by unauthorized attachments, alterations, modifications or foreign objects
- damage caused by improper maintenance
- damage caused by any other abuse, misuse, mishandling, or misapplication
- products purchased from third party vendors

SOFTWARE UPGRADES AND POLICIES:

RS2 has authored many software products and differentiates them by product name, edition and release version. The release version is split into two parts, major and minor. The major release version number (the "Major Version") is the first digit of a set of three values. When the first digit increases it is said to be a major revision of the software for example going from version 1.0.0 to 2.0.0 or 1.1.0 to 2.0.10. Major Versions usually contain new features and upgradeable options offering greater flexibility. The minor release version (the "Minor Version") number(s) are the second or third digits of a set of three values. When the second or third digits increase, it is said to be a minor revision of the software for example going from version 1.1.24 to 1.1.29 or 1.1.24 to 1.2.10. Minor Versions usually contain small software fixes and tweaks improving performance and reliability.

All RS2 software products carry a product life-cycle and are published on the RS2 website. Product life-cycles are a period of time for which support is available on a specific product's Major Version. RS2 considers a product's life-cycle to be terminated when it is older than the current Major Version plus one previous Major Versions.

RS2 software product support is based on the published life-cycles. Terminated Major Versions will not be supported and require the Dealer to upgrade to the current Major Version for any further assistance.

Existing systems may upgrade to the current Major Version regardless of what Major Version they are currently at. For pricing, reference the Access Control Version Upgrades section of the current RS2 Dealer Price Schedule as Major Version upgrades may only be purchased through a Dealer. Dealers who have installed software within 90 days of the RS2 billing date shall qualify for a free upgrade to the current Major Version. The Dealer must supply the software key (dongle) serial number before an upgrade is performed. All software keys (dongles) are tracked by a serial number which references the invoice number containing the RS2 billing date. All Minor Version upgrades shall be available free of charge for the product's lifecycle.

VERSION UPGRADES (VU):

A VU is used to upgrade software products from an earlier version to the current release. A VU is only available for a currently supported version of the software. Refer to the Product Life-Cycle Chart to determine if a product is currently supported. If your customer has a non-supported version, contact your Regional Sales Manager.

NOTE: A VU may not be used to go from an SL8 to an SL25 or an ESSL8 to an ESSL25. Both of these examples are software upgrades and not version upgrades. To upgrade your current software license please refer to the SU section of the price list.

SOFTWARE UPGRADES (SU):

A SU is used when upgrading a software license to a larger license. The SU is the credit amount that you get for the original software license towards the larger license. When ordering you must include the serial number of the original dongle.

NOTE: In order to get the SU credit, the customer must be running the current version of the software. If the customer is not running the current version of the software, they must purchase a VU for the existing software.

DIRECT SUPPORT AGREEMENTS (DSA):

A DSA includes all version upgrades that occur as well as including the ability for the customer to contact RS2 Technical Support directly for software related issues with their Universal software. Please see the DSA on our web site to get a complete list of covered support issues and a list of exclusions. The DSA is a contract between RS2, the supporting dealer and the customer.

NOTE: A DSA is for business hours support only, which is Monday through Friday, 8:00 AM to 5:00 PM Central Time and does not include holidays.

| System Controllers | | |
| MINI-SCP | System control processor, 512K RAM (non-expandable), 1 RS-232/485 host port, 2 two wire RS-485 channels for communication to a maximum of 32 I/O modules. NOTE: Compatible with the MR-50, MR-52, MR-16IN and MR-16OUT access control modules. NOTE: The MINI-SCP has ONLY 512K of RAM and should no longer be used as a System Control Panel (SCP)! The EP Series of SCP's should be used. WARNING: This is a Discontinued Product and availability IS Limited!!! | 809 |
| MINI-SCPE | System control processor with 10Base-T Ethernet connectivity, 512K RAM (non-expandable), 1 RS-232/485 host port, 2 two wire RS-485 channels for communication to a maximum of 32 I/O modules. NOTE: Compatible with the MR-50, MR-52, MR-16IN and MR-16OUT access control modules. NOTE: The MINI-SCPE has ONLY 512K of RAM and should no longer be used as a System Control Panel (SCP)! The EP Series of SCP's should be used. WARNING: This is a Discontinued Product and availability IS Limited!!! | 1,133 |
| EP-1501 | Intelligent single portal two reader PoE combination controller with 10/100Base-T Ethernet connectivity and dual reader ports and 6MB RAM (non-expandable) - two reader ports support separate IN/OUT readers of all types and technologies, including Wiegand, clock and data, magstripe, keypads, LCD and biometrics. Includes: one door contact, one request to exit input, one door strike relay, and one programmable output relay NOTE: Each EP-1501 does NOT add to the total SCP count for Access It! Universal. NOTE: Each EP-1501-PLUS does add to the total SCP count for Access It! Universal. NOTE: EP-1501 will not support the MR-50, MR-51E, MR-52, MR-16IN and MR-16OUT access control modules in Universal but the EP-1501-PLUS will support all the SIO's. This is the same physical board it is simply a definition that is set in the Universal software. | 775 |
| EP-1502 | Intelligent two portal two reader combination system controller with 10/100Base-T Ethernet connectivity and dual reader interface module, 6MB RAM (non-expandable), 1 RS-232/485 host port, with a secondary RS-232/485 host port for redundancy, 1 two wire RS-485 channel for communication to a maximum of 31 I/O modules, support for up to two magstripe or Wiegand readers. Includes: two door contacts, two request to exit inputs, two door strike relays, four programmable inputs and two output relays NOTE: Compatible with the MR-50, MR-51E, MR-52, MR-16IN and MR-16OUT access control modules. | 1,487 |
| EP-2500 | System control processor with 10/100Base-T Ethernet connectivity, 12MB RAM (non-expandable), 1 primary RS-232/485 host port with a secondary RS-232/485 host port for redundancy, 2 two wire RS-485 channels for communication to a maximum of 32 I/O modules. NOTE: Compatible with the MR-50, MR-51E, MR-52, MR-16IN and MR-16OUT access control modules. | 2,223 |
| EP-2500-RNIC | System control processor with 10/100Base-T Ethernet connectivity, 12MB RAM (non-expandable), 1 primary RS-232/485 host port with a 10 Base-T Onboard Ethernet NIC – Embedded Device Server for redundancy, 2 two wire RS-485 channels for communication to a maximum of 32 I/O modules. NOTE: Compatible with the MR-50, MR-51E, MR-52, MR-16IN and MR-16OUT access control modules. | 2,547 |
| EP-2500-RNIC100 | System control processor with 10/100Base-T Ethernet connectivity, 12MB RAM (non-expandable), 1 primary RS-232/485 host port with a 10/100 Base-T Onboard Ethernet NIC – Embedded Device Server for redundancy, 2 two wire RS-485 channels for communication to a maximum of 32 I/O modules. NOTE: Compatible with the MR-50, MR-51E, MR-52, MR-16IN and MR-16OUT access control modules. | 2,568 |
| System Controller Options | | |
| 2GL-2G | 2g Lite Board To 2g Upgrade NOTE: Required if the board is to support more than 8 card readers and/or more than 5,000 cards. | 378 |
| Door Controllers | | |
| MR-50 | Single Portal One Reader interface module - support for up to one magstripe or Wiegand reader Includes: one door contact, one request to exit input, one door strike relay and one programmable output relay NOTE: Requires an EP-1501-PLUS, EP-1502 or EP-2500 system controllers. NOTE: Requires a 4AP adapter plate to mount up to four MR-50 boards within a NCL enclosure. | 414 |

| ACCESS CONTROL MODULES | | |
| MR-51E | Single Portal Two Reader PoE ethernet interface module with dual reader ports - two reader ports support separate IN/OUT readers of all types and technologies, including Wiegand, clock and data, magstripe, keypads, LCD and biometrics. Auto-addressable and directly managed by EP series system controllers. Includes: one door contact, one request to exit input, one door strike relay, two programmable inputs and one programmable output relay NOTE: Requires an EP-1501-PLUS, EP-1502 or EP-2500 system controllers. NOTE: The MR-51E is recommended (but no longer required) to be connected to the same Switch (network device) as the EP Controller | 643 |
| MR-52 | Two Portal Two Reader interface module - support for up to two magstripe or Wiegand readers Includes: two door contacts, two request to exit inputs, two door strike relays, four programmable inputs and four output relays NOTE: Requires an EP-1501-PLUS, EP-1502 or EP-2500 system controllers. | 837 |
| Input And Output Controllers | | |
| MR-16IN | Input monitor module - 16 normally open or closed, supervised or non-supervised inputs for monitoring vital alarm points or for providing elevator floor selection control. Includes: 2 programmable output relays and (32) 1K ohm resistors for supervisory wiring NOTE: Requires an EP-1501-PLUS, EP-1502 or EP-2500 system controllers. | 928 |
| MR-16OUT | Output control module - 16 programmable output relays with the option of being configured as fail-safe or fail-secure. These relays support "On", "Off" or "Pulse" modes for a variety of applications such as elevator control or any device requiring dry contacts. NOTE: Requires an EP-1501-PLUS, EP-1502 or EP-2500 system controllers. | 928 |
| Communication Multiplexer | | |
| MUX-8 | Multiplexer module - converts one RS-485 two wire channel into eight separate RS-485 two wire channels. This is useful in star topologies where the reader interface may be located above the door and not centrally. The MUX-8 rejuvenates the signal making runs longer than 4,000' possible. | 680 |
| M5 Hardware | | |
| M5-IC | Intelligent System Controller, 32 MB RAM with Ethernet, Dual RS485 ports | 1,401 |
| M5-2K | M2000 bridge product NOTE: Requires a M5-IC system controller. | 1,442 |
| M5-2RP | Reader Interface Module (2Rdr, 4 inputs, 6 outputs) Supervised Reader Interface | 753 |
| M5-2SRP | Reader Interface Module with Supervised Door Input & Rex (2Rdr, 4 inputs, 6 outputs) | 753 |
| M5-8RP | Module with 8 Supervised Rdr Connections | 1,185 |
| M5-COM | System Combination Power & RS485 Communication Bridge | 343 |
| M5-20IN | 20 Zone Input Monitor Module | 775 |
| M5-16DO | 16 Digital Output Control Module | 667 |
| M5-16DOR | 16 Relay Output Controller Module (16 solid state relays) | 732 |

| *** New Quick Ship (QS) Program *** | | |
| <p>As a part of RS2's continuous effort to provide "World Class" service to our partners we are implementing a "QS" (Quick Ship) Designation to many of our Reader and Card offerings. If you have an urgent need for readers or cards for a particular project or client please make sure to take note of this designation for your best chance for a successful outcome! RS2 has continued to deepen our stock level of all our products as our business expands and with the launch of this program will be deepening them even more! We are also working with our OEM Partners to back our stock level up with additional stock in a "ready to ship" condition to help us take care of those larger orders as well. As always "Never say NEVER and even less often say ALWAYS" but we are confident this will help us keep to our order fulfillment goal of "in by 1 out by 5" for all of our main line items!!!</p> <p>Note: Initially the QS Program will start with only a few of our most popular readers but we will be expanding it considerably during 2014!</p> <p>Note: RS2 will strive to meet the following minimum capacities for the items listed as "QS":</p> <p>1.) For Card Readers of 10 or more 2.) For Credentials of 200 or more</p> | | |
| *** Lock License Fees *** | | |
| <p>All Locks, Locksets and other Wireless Devices purchased through RS2 will include the associated "Lock License" in their purchase price! Any such devices purchased through other channels shall require a "Lock License Fee" (LLF) as outlined in the appropriate section below! The only exceptions to this requirement will be for the IP Enabled Locksets manufactured by ASSA ABLOY (SARGENT, CORBIN RUSSWIN & YALE) and the AD300 & 400 Locksets manufactured by Allegion in which cases a serial number must be provided for each Lockset to obtain the "Lock License"! If serial numbers on these devices cannot be provided for any reason the LLF's will apply to all devices added to an RS2 system!!!</p> | | |
